

PARAMKUSAM CHANDU GOPALA KRISHNA

Associate Software Engineer – Java, Python & Data Platform Components

Bengaluru, Karnataka, India (Hybrid Ready) | +91 6302029759 | chanduparamkusam@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 1+ years of experience designing, coding, and developing backend web services and data-driven solutions using Java and Python. Grounded in Computer Science fundamentals, core data structures, algorithms, and object-oriented programming (SOLID). Experienced in translating system designs into modular code configurations under time-bound sprint requirements, analyzing database chokepoints, and implementing unified exception handling layers. Collaborative team player focused on understanding enterprise workflows and maintaining stable product operations.

TECHNICAL SKILLS

Core Programming:	Java (Expert), Python (Expert), SQL, JavaScript, HTML5, CSS3
Backend Frameworks:	Spring Boot, Spring MVC, RESTful API Design, Microservices, Python Flask, Client-Server Tiers
Databases & Systems:	MySQL, MS SQL Server, PostgreSQL, Relational Data Modeling, Query Optimization, Database Indexing
Testing & QA:	Unit Testing (JUnit), Mockito, Test-Driven Development (TDD), Integration Testing, Postman Verification
DevOps & Infrastructure:	AWS Cloud Fundamentals (EC2, S3), Git, GitHub, Jenkins, Maven, CI/CD Test Automation Loops
Emerging Track Exposure:	AI/ML Service Integration, Big Data Core Foundations, Predictive Processing Architecture
Methodologies & Tools:	Agile/Scrum Frameworks, Peer Code Reviews, JIRA, Confluence, Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Software Engineer Talent Trek Technologies	Bengaluru, India May 2025 – Present
- Designed, coded, and developed backend solution layers inside a time-bound sprint calendar for tasks across 3 enterprise web application suites. - Collaborated closely with technical leads and senior development colleagues to integrate project best practices and absorb system architecture workflows. - Isolated runtime database execution bottlenecks inside MySQL and SQL Server tables, applying custom composite index sweeps to reduce latency by 190ms. - Wrote clear, well-documented REST APIs with robust parameter filtering validation filters and global exception handlers. - Constructed comprehensive unit and integration check sweeps using JUnit and Mockito to enforce codebase stability before delivery. - Participated in technical peer code evaluations, checking incoming branches for formatting consistency, error handling separation, and SOLID layout principles. - Maintained build configurations and continuous testing tasks inside Git and Jenkins pipelines to accelerate sprint turnarounds by 75%. - Tracked active bug tickets, logged step-by-step replication data models, and managed resolution notes using JIRA and Confluence.	
Software Developer Intern Talent Trek Technologies	Bengaluru, India Mar 2025 – May 2025
- Supported internal development tracks by coding core backend service functionalities and modular processing utility loops in Java. - Isolated application bugs by analyzing server exceptions, compiling bug reports, and deploying targeted script patch modifications. - Drafted functional specifications and internal engineering documentation detailing payload inputs and baseline system parameters.	

KEY PROJECTS & TECHNICAL ACHIEVEMENTS

Distributed Fraud Detection & Predictive Analytics Platform (Shodhak AI)

Tech: Java, Spring Boot, Python, Flask, REST APIs, MySQL, JWT, TDD, Cloud Infrastructure

- Architected an automated multi-tiered data transaction validation platform, mapping seamless communication paths between Spring Boot and Python Flask engines.
- Programmed python-based Flask microservices that orchestrate secure background data exchanges with a primary Java Spring Boot service layer.
- Optimized transaction table configurations inside MySQL using targeted composite indexing, ensuring reliable sorting performance under concurrent loads.
- Followed strict Test-Driven Development (TDD) rules, writing functional validation layers before logic execution to maintain clear alignment with technical requirements.

Enterprise Healthcare Platform (Client Project)

Tech: Java, Spring Boot, MS SQL Server, PostgreSQL, RESTful Services, Swagger, Data Modeling

- Coded the core backend service infrastructure handling critical operational matrices, including appointment channels, patient history assets, and automated billing invoicing.
- Normalized complex entity dependencies across SQL Server and PostgreSQL instances, protecting system data links while removing redundant storage blocks.
- Exposed clean RESTful footprints documented interactively via Swagger configurations, simplifying cross-functional tracking across engineering tracks.

Online Examination Portal & High-Concurrency Subsystems

Tech: Java, Spring Boot, MySQL, Core Data Structures, Integration Testing

- Built high-concurrency database storage scripts and calculation synchronization layers to process multiple simultaneous client actions securely.
- Refactored legacy computation methods in StudentController.java to query active session parameters straight from the database exam entity rather than trusting dynamic client-side payloads, completely flattening timer exploitation vulnerabilities.

EDUCATION & CREDENTIALS

B.Tech in Electronics & Communication Engineering

2021 – 2024

VFSTR University, Andhra Pradesh | CGPA: 7.23/10 (Exceeds 60% Criteria / 2024 Graduate)

- **Academic Standing Matrix:** Secured >60% aggregate across Class X, Class XII, and B.Tech coursework.
- **Java Full Stack Developer Certification** | JSpiders & QSpiders | Completed Technical Track
- **Professional Technical Certifications:** Data Structures & Algorithms | Java Programming | Cloud Computing (NPTEL Certified)

ADDITIONAL INFORMATION

Availability: Immediate

Work Model: Open to 2 days/week in Bengaluru office (Hybrid Ready)

Languages: English (Fluent)

Academic Track: 15+ Years Full Education (No Active Backlogs)

Organizational Commitment: Aligned and committed to the 2-year organizational tenure baseline.

Aadhaar Verification: [Aadhaar Number Redacted for Privacy]
