Education

Vignan's Foundation for Science, Technology and Research

2021 – 2024

Bachelor of Technology – Electronics & Communication Engineering (ECE)

Vadlamudi, Andhra Pradesh

Experience

Talent Trek Technologies

Apr 2025 – Present

Associate Software Engineer

Bengaluru (Remote)

- Developed and maintained RESTful APIs using Java 17 and Spring Boot, serving multiple frontend and third-party client integrations.
- Implemented microservices architecture to decouple business logic, improving system modularity and reducing deployment risk.
- Designed PostgreSQL database schemas and wrote optimized queries, cutting average query response time by ~30%.
- Integrated Hibernate/JPA for ORM-based data persistence, significantly reducing boilerplate SQL code across modules.
- Collaborated in an Agile team, participating in sprint planning, code reviews, and daily standups to deliver features on schedule.
- Used Postman to test and validate API endpoints before production deployment, ensuring zero critical bugs in released APIs.

CODTECH IT Solutions

Mar 2025 – May 2025

Java Backend Developer Intern

Remote

- Built RESTful API modules for an internal project using Spring Boot and MySQL, contributing to end-to-end backend feature delivery.
- Wrote and tested CRUD operations using Spring Data JPA and Hibernate, gaining hands-on experience with real-world data workflows.
- Documented API contracts using Postman collections, enabling smooth handoff to the frontend team.

JSpiders Training & Development Center

Sep 2024 – Nov 2024

Java Full Stack Trainee

Hyderabad

- Completed intensive full-stack Java training covering Core Java, OOP, JDBC, Spring Boot, REST APIs, and React.js fundamentals.
- Built 3+ hands-on mini-projects including a Spring Boot CRUD application with a React.js frontend.
- Developed strong foundations in MVC design pattern and layered architecture (Controller → Service → Repository).

Projects

Shodhak AI – Real-Time E-Commerce Fraud Detection System | Java 17, Spring Boot, Python, Flask, PostgreSQL, React.js

- Designed and deployed a full-stack AI fraud detection platform that identifies fake product reviews and return abuse in real time.
- Built a Java Spring Boot REST API backend that routes review data to a Python Flask NLP microservice using TextBlob sentiment analysis.
- Implemented a fraud-scoring algorithm that classifies reviews as genuine, suspicious, or fraudulent based on sentiment polarity and behavioral signals.
- Independently handled end-to-end delivery: system design, backend API, ML integration, React.js frontend, and cloud deployment on Netlify.

Technical Skills

Languages: Java 17, Python, JavaScript, SQL, HTML, CSS

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC, Flask, React.js

Databases: PostgreSQL, MySQL

Developer Tools: Git, GitHub, Maven, Docker (learning), Postman, IntelliJ IDEA

Concepts: REST APIs, Microservices, JWT Authentication, MVC Architecture, NLP (TextBlob)

Certifications & Achievements

Java Full Stack Development

2024

JSpiders Training & Development Center

- Independently built and deployed a live, production-ready AI product (Shodhak AI) within 1 year of starting professional development career.
- Delivered RESTful APIs end-to-end with zero critical production bugs in current role at Talent Trek Technologies.
